

# DUSTBLOCKER 450

## AIR CLEANERS FOR THE HOME OWNER, TRADE AND HIRE INDUSTRY.

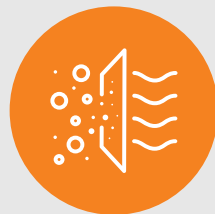

The MAXVAC DB450 has been especially designed to protect and assist the tradesman. It integrates perfectly with your tool kit, protects your health and makes a massive difference to dust levels and clean up times on site. HEPA13 Carbon filters remove odours and all dust particles down to 0.3micron, which is protecting your customer and colleagues and a huge plus point for customer satisfaction. Use as a stand alone unit to recycle the air, or use the integral, 2m flexible hose to exhaust the air out through a window or vent or in the case of a bathroom refurb, remove the WC and plug it into the soil stack. This creates a negative pressure in the room and prevents dust circulating round the property.

The DB450, is the perfect assistant for the tradesman or DIY on any remodelling or fit out project, from beginning to end. You will be amazed, just how much dust it clears and clean up time it saves.

Code: MV-DB450

### SPECIFICATION

|                      |                       |
|----------------------|-----------------------|
| Voltage              | Dual Voltage 110/230V |
| Power                | 140w                  |
| Air flow inc filters | 0-450m3/hr variable   |
| Filter type          | HEPA13-Carbon/G4/G3   |
| Warranty             | 2 years               |
| Noise Level          | 59 ~dB(A)             |
| Dimensions           | 40 x 20 x 42h         |
| Weight               | 10Kg                  |
